WELDING JOURNAL INDEX

VOLUME 61—1982

PUBLISHED BY THE AMERICAN WELDING SOCIETY, P.O. Box 351040, Miami, FL 33135

Part 1—WELDING JOURNAL

SUBJECT INDEX

*Abrasive Wear, Selective Surfacing Takes the Brunt of High—56 (Nov.).

Adaptive Feed-Forward Digital Control of GTA Welding—J. J. Scott and H. Brandt, 36 to 41 (Mar.).

Aerospace Industry, Selected Furnace Brazed Components for the—W. T. Hooven, III, 15 to 20 (Oct.).

Alcohol on a Manual Arc Welding Task, The Effect of—D. L. Price and R. J. Liddle, 15 to 19 (July).

*Aluminum Extrusion Triples Mast Inventory —54, (Feb.).

*Aluminum Radiator Tubes at 600 FPM, Mill Welds Thin-Wall—52 (Oct.).

Arc Blow, Remanent Magnetism—A Cause of—E. Halmoy, 43 to 47 (Sept.).

Arc Welding, Some Aspects of Bead Deposition in Underwater Gas Metal—D. Chandiramani, 35 to 38 (May).

Arc Welding Control, Infrared Temperature Sensing of Cooling Rates for—W. E. Lukens and R. A. Morris, 27 to 33 (Jan.).

*Arc Welding Robot Senses, Corrects for Fit-up Errors—53 (Sept.).

Aspects of Bead Deposition in Underwater Gas Metal Arc Welding, Some—D. Chandiramani, 35 to 38 (May).

Attachments of Thermocouple Instrumentation to Test Components by All-Position Percussion Welding—E. G. Thompson, 31 to 33 (June).

*Automated Welding System Turns Out Radiator Supports at 10/Minute—57 to 58 (Sept.).

Automatic Brazing Systems—C. Henschel and D. Evans, 29 to 32 (Oct.).

*Automatic GMAW Speeds Transmission Part Production—54 to 55 (Sept.).

*Auto Wheels an Hour, Welding Line Assembles 900—44 to 45 (Aug.).

*Axle Welding, Programmable System Automates—56 (Sept.).

*Baggage Carts Built to Take It—43 (June).

*Barge Builder Refines Weld-Assembly Methods, Minnesota—J. Weber, 44 to 45 (Dec.).

Bead Deposition in Underwater Gas Metal Arc Welding, Some Aspects of—D. Chandiramani, 35 to 38 (May).

*Bent Welded Industrial Rings Draw Interest, Lower Cost—40 to 41 (May).

Brazed Components for the Aerospace Industry, Selected Furnace—W. T. Hooven, III, 15 to 20 (Oct.).

Brazing Filler Metals for Titanium Assemblies, Laminating—S. W. Lan, 23 to 28 (Oct.).

Brazing Systems, Automatic—C. Henschel and D. Evans, 29 to 32 (Oct.).

*Buckling in Weld Repair of Thin-Gauge Stainless, Compound Stops—42 (May).

Butt Welds Using Electromagnetic-Acoustic Transducers, Ultrasonic Nondestructive Evaluation of—C. M. Fortunko and R. E. Schramm, 39 to 46 (Feb.).

Ceramic Weld Backing Evaluation—R. E. Cantrell, 27 to 34, (March).

Challenge to Inspection Know-How—A Case History—R. Hudson, 21 to 26 (Feb.).

*Clad Plate Cuts Costs, Maintenance of EB Welding Units—43 (Aug.).

*Compact Plasma Torch Solves Surfacing Problem—44 (May).

*Compound Stops Buckling in Weld Repair of Thin-Gauge Stainless—42 (May).

*Consultants—More than Troubleshooters, Welding—O. McWayne, 63 to 64 (April).

*Convertible, Welding Helps Bring Back the Classic American—50 to 51 (Oct.).

Cooling Rates for Arc Welding Control, Infrared Temperature Sensing of—W. E. Lukens and R. A. Morris, 27 to 33 (Jan.).

Copper-Nickel for Ship Hull Constructions—Welding and Economics—L. W. Sandor, 23 to 30 (Dec.).

Curtains, Transparent Welding—D. H. Sliney, C. E. Moss, C. G. Miller and J. B. Stephens, 17 to 24 (May).

Design of Welding Examination—P. D. Watson, 32 to 35 (Feb.).

Development of Stainless Steel Sealing Washers for LNG Tanker Repairs—W. R. Schick, 15 to 21 (Dec.).

Diffusion of Welding for Water-Cooled Gas Turbine Applications—D. R. Spriggs and M. C. Muth, 41 to 48 (Nov.).

Digital Control of GTA Welding, Adaptive Feed-Forward—J.J. Scott and H. Brandt, 36 to 41 (Mar.).

*Do's and Dont's of Electrode Wire Selection—51 to 52 (Mar.).

Dragline, Electroslag Welding Used to Fabricate World's Largest Crawler Driven—J. S. Noruk, 15 to 19 (Aug.).

*A Practical Welder article

Dye Penetrant and Magnetic Particle Inspection—R. Selner, 28 to 31 (Feb.).
*EB Welding Units, Clad Plate Cuts Costs, Maintenance—43 (Aug.).
Effect of Alcohol on a Manual Arc Welding Task—D. L. Price and R. J. Liddle, 15 to 19 (July).
Effects of Welding Health: Evidence, Problems, Future Research Suggestions, The—R. S. Anderson, 40 to 44 (April).
Effects of Wind on Radiographic Quality of Weld Deposition in Low-Hydrogen SMAW Electrodes—K. W. Henrie and R. E. Long, 47 to 50 (April).
Efficiency and Economy of the Oxyacetylene Process—H. A. Sosnin, 46 to 48 (Oct.).
Electrodeposition to Provide Coatings for Solid State Bonding, Use of—J. W. Dini, 33 to 39 (Nov.).
*Electrode Wire Selection, Do's and Dont's of—51 to 52 (Mar.).
Electromagnetic-Acoustic Transducers, Ultrasonic Nondestructive Evaluation of Butt Welds Using—C. M. Fortunko and R. E. Schramm, 39 to 46 (Feb.).
Electron Beam Gun Operation in the Soft Vacuum Environment, Mobile—G. A. Goeppner, 33 to 38 (April).
Electron Beam Welding in India, Nuclear Applications of—S. Challappa, R. S. Alekal and M. G. Shrinivasan, 35 to 39 (Jan.).
Electroslag Welding Used to Fabricate World's Largest Crawler Driven Dragline—J. S. Noruk, 15 to 19 (Aug.).
*Energy Costs, Shipbuilder Beats the Elements While Cutting—46 to 47 (Dec.).
Equipment Applications for Robots—R. J. Keag, Jr., 37 to 40 (Sept.).
Examination, Design for Welding—P. D. Watson, 32 to 35 (Feb.).
*Extra Operation Speeds Production—46 (May).
Failures: They Could Be the Result of Violating Simple Design Principles, Part I, Weld—O. W. Blodgett, 16 to 23 (Mar.).
Failures: They Could Be the Result of Violating Simple Design Principles, Part II, Weld—O. W. Blodgett, 25 to 31 (April).
Filler Metals for Titanium Assemblies, Laminating Brazing—S. W. Lan, 23 to 28 (Oct.).
*Fit-up Errors, Arc Welding Robot Senses, Corrects for—53 (Sept.).
Flame Cutting of Beveled Mitre Joints, Mechanized—L. J. Privoznik and S. C. Light, Jr., 37 to 40 (Aug.).
Flash Butt Welding of Marine Pipeline Materials—D. L. Turner, Jr., B. E. Paton, V. K. Lebedev and S. I. Kutchuk-Yatsenko, 17 to 22 (April).
*Flexible Manufacturing Speeds Tank Assembly—54 to 55 (Feb.).
Flux Practices in the Lamp Industry, Soldering and—I. S. Goodman, 34 to 37 (Oct.).
*Flux Recovery System, Wheel Maker Cuts Cost with Vacuum—50 (Jan.).
Flux Technology, Some Recent Advances In—W. Rubin, 39 to 44 (Oct.).
*Fume Removal System Cuts Costs, Recirculates Air, Welding—53 to 54 (Nov.).
Galvalume Sheet Steel, Resistance Welding of—J. C. Baker and C. F. Meitzner, 21 to 28 (June).
Gas Turbine Applications, Diffusion Welding for Water-Cooled—D. R. Spriggs and M. C. Muth, 41 to 48 (Nov.).
*Giant X-ray Source Checks Nuclear Reactor Vessels—49 (Feb.).
*GMAW a Plus for Midwestern Metalworker, Pulsed—J. Weber, 51 to 52 (Nov.).
GMAW Means Understanding Wire Quality, Equipment and Process Variables, Reliable—K. A. Lyttle, 43 to 48 (Mar.).
*GMAW Speeds Transmission Part Production, Automatic—54 to 55 (Sept.).
GTA Welding, Adaptive Feed-Forward Digital Control of—J. J. Scott and H. Brandt, 36 to 41 (Mar.).
GTA Welding, The Improvement of Efficiency in Out-of-Position—Y. Ogata, I. Aida, M. Nagashima and K. Shibuya, 27 to 34 (Aug.).
Hardfacing Alloys, Selection and Use of—R. J. Dawson, S. Shewchuk and J. E. Pritchard, 15 to 23 (Nov.).
*Hardfacing Technology—Fighting the Battle Against Wear—R. Lee Baker, 42 to 44 (July).
Health: Evidence, Problems, Future Research Suggestions, The Effects of Welding on—R.S. Anderson, 40 to 44 (April).
*Heavy Equipment Welding Systems Go Beyond Robotics—J. Weber, 50 to 51 (Sept.).
High Current Resistance Welding of Nuclear Waste Containers—B. J. Eberhard and J. W. Kelker, Jr., 15 to 19 (June).
*Home Study Course Educates Distributor Salesforce, Welding Technology—42 to 43 (Aug.).
*How to Avoid Regulator Burnout—48 (Dec.).
Hydrogen SMAW Electrodes, Effects of Wind on Radiographic Quality of Weld Deposited with Low—K. W. Henrie and R. E. Long, 47 to 50 (April).
Improved Method for the Determination of Water in Welding Electrode Coatings—E. L. Montgomery, 39 to 42 (Dec.).
Improvement of Efficiency in Out-of-Position GTA Welding—Y. Ogata, I. Aida, M. Nagashima and K. Shibuya, 27 to 34 (Aug.).
India, Nuclear Applications of Electron Beam Welding in—S. Challapa, R. S. Alekal and M. G. Shrinivasan, 35 to 39 (Jan.).
Infrared Temperature Sensing and Cooling Rates for Arc Welding Control—W. E. Lukens and R. A. Morris, 27 to 33 (Jan.).
Inspection Know-How—A Case History, A Challenge to—R. Hudson, 21 to 26 (Feb.).
Integration of a Robotic Welding System with Existing Manufacturing Processes—R. C. Wolke, 23 to 28 (Sept.).
Laminating Brazing Filler Metals for Titanium Assemblies—S. W. Lan, 23 to 28 (Oct.).
Lamp Industry, Soldering and Flux Practices—I. S. Goodman, 34 to 37 (Oct.).
*Largest Tube Weld Line Delivered—53 (Oct.).
Magnetic Particle Inspection, Dye Penetrant and—R. Selner, 28 to 31 (Feb.).
Magnetism—A Cause of Arc Blow, Remanent—E. Halmoy, 43 to 47 (Sept.).
Manual Arc Welding Task, The Effect of Alcohol on a—D. L. Price and R. J. Liddle, 15 to 19 (July).
Marine Pipeline Materials, Flash Butt Welding of—D. L. Turner, Jr., B. E. Paton, V. K. Lebedev and S. I. Kutchuk-Yatsenko, 17 to 22 (April).
Mechanized Flame Cutting of Beveled Mitre Joints—L. J. Privoznik and S. C. Light, Jr., 37 to 40 (Aug.).
*Mechanized Welding Revives Shipyard Productivity—43 to 45 (Jan.).
Metallurgy Superalloys, A New Approach to the Weldability of Nickel-Base As-Cast and Powder—M. H. Haafkens and J. H. G. Matthey, 25 to 30 (Nov.).
*Mill Welds Thin-Wall Aluminum Radiator Tubes at 600 FPM—52 (Oct.).
*Minnesota Barge Builder Refines Weld-Assembly Methods—J. Weber, 44 to 45 (Dec.).

*A Practical Welder article

Mobile Electron Beam Gun Operation in the Soft Vacuum Environment – G. A. Goeppner, 33 to 38 (April).
Multi-Electrodes in SAW with Square Wave AC Power – T. A. Bunker, 36 to 40 (July).
Narrow-Gap Welding of Thick-Walled Components, Submerged Arc – H. Hantsch, K. Million and H. Zimmerman, 27 to 34 (July).
*Navy Saves Millions Surfacing New and Worn Equipment – 44 to 46 (June).
NDT: Profit, Not Cost in Welding – J. K. Aman, 16 to 18 (Feb.).
New Approach to the Weldability of Nickel-Base As-Cast and Powder Metallurgy Superalloys – M. H. Haafkens and J. H. G. Matthey, 25 to 30 (Nov.).
Nickel-Base As-Cast and Powder Metallurgy Superalloys, A New Approach to the Weldability of – M. H. Haafkens and J. H. G. Matthey, 25 to 30 (Nov.).
*Nickel Stainless Tanks Boost Brewer's Yield, Welded – 46 (Aug.).
North Sea Oil, Unique Structure to Tap – J. Weber, 21 to 25 (July).
Nuclear Applications of Electron Beam Welding in India – S. Challappa, R. S. Alekal and M. G. Shrinivasan, 35 to 39 (Jan.).
*Nuclear Reactor Vessels, Giant X-Ray Source Checks – 49 (Feb.).
Nuclear Waste Containers, High Current Resistance Welding of – B. J. Eberhard and J. W. Kelker, Jr., 15 to 19 (June).
Out-of-Position GTA Welding, The Improvement of Efficiency in – Y. Ogata, I. Aida, M. Nagashima and K. Shibuya, 27 to 34 (Aug.).
Oxyacetylene Process, Efficiency and Economy of the – H. A. Sosnin, 46 to 48 (Oct.).
Percussion Welding, Attachment of Thermocouple Instrumentation to Test Components by All-Position – E. G. Thompson, 31 to 33 (June).
Pipeline Materials, Flash Butt Welding of Marine – D. L. Turner, Jr., B. E. Paton, V. K. Lebedev and S. I. Kutchuk-Yatsenko, 17 to 22 (April).
*Piping, Socket Welds – Inexpensive Design for Small Diameter – J. Laskonis and G. Lycan, 50 to 51 (Feb.).
Planning the Total Plasma Arc Cutting System – S. A. Maguire, 33 to 37 (Dec.).
Plasma Arc Cutting System, Planning the Total – S.A. Maguire, 33 to 37 (Dec.).
*Plasma Spray System Hikes Fan Disc Output – 53 to 54 (Mar.).
*Plasma Torch Solves Surfacing Problem, Compact – 44 (May).
*Pollution Control Pays for Shock Absorber Manufacturer – 46 (Jan.).
*Portable Welding Unit, Shipbuilder Hikes Production with – 39 to 40 (June).
*Productivity; Welding, Robots and – K. E. McKee, 30 to 35 (Sept.).
*Programmable Machine GMA Welds Wide Range of Parts – 48 (July).
*Programmable Machine Makes Eight Welds Per Hour – 58 (Nov.).
*Programmable System Automates Axle Welding – 56 (Sept.).
*Pulsed GMAW a Plus for Midwestern Metalworker – J. Weber, 51 to 52 (Nov.).
*Radiator Supports at 10/Minute, Automated Welding System Turns Out – 57 to 58 (Sept.).
*Radiator Tubes at 600 FPM, Mill Welds Thin-Wall Aluminum – 52 (Oct.).
*Regulator Burnout, How to Avoid – 48 (Dec.).
Reliable GMAW Means Understanding Wire Quality, Equipment and Process Variables – K. A. Lyttle, 43 to 48 (Mar.).
Remanent Magnetism – A Cause of Arc Blow – E. Halmoy, 43 to 47 (Sept.).
Resistance Welding of Galvalume Sheet Steel – J. C. Baker and C. Meitzner, 21 to 28 (June).
Resistance Welding of Nuclear Waste Containers, High Current – B. J. Eberhard and J. W. Kelker, Jr., 15 to 19 (June).
*Rings Draw Interest, Lower Costs; Bent/Welded Industrial – 40 to 41 (May).
*Robot Senses, Corrects for Fit-up Errors; Arc Welding – 53 (Sept.).
Robotic Arc Welding – What Makes a System? – D. P. Soroka and R. D. Sigman, 15 to 21 (Sept.).
*Robotics, Heavy Equipment Welding Systems Go Beyond – J. Weber, 50 to 51 (Sept.).
Robotic Welding System with Existing Manufacturing Processes, Integration of a – R. C. Wolke, 23 to 28 (Sept.).
Robots, Equipment Applications for – R. J. Keag, Jr., 37 to 40 (Sept.).
Robots and Productivity; Welding – K. E. McKee, 30 to 35 (Sept.).

SAW with Square Wave AC Power, Multi-Electrodes in – T. A. Bunker, 36 to 40 (July).
*Scrap Pile Welder Training – D. Ragsdale, 57 (April).
*Sculptor Welds Himself a Studio – 52 to 53 (Feb.).
Selected Furnace Brazed Components for the Aerospace Industry – W. T. Hooven, III, 15 to 20 (Oct.).
Selection and Use of Hardfacing Alloys – R. J. Dawson, S. Shewchuk, J. E. Pritchard, 15 to 23 (Nov.).
*Selective Surfacing Takes the Brunt of High Abrasive Wear – 56 (Nov.).
Ship Hull Constructions – Welding and Economics, Copper-Nickel for – L. W. Sandor, 23 to 30 (Dec.).
Ship Machinery Components, Thermal Spraying Naval – M. D. Schmeller and S. W. Vittori, 21 to 25 (Aug.).
*Shipbuilder Beats the Elements While Cutting Energy Costs, 46 to 47 (Dec.).
*Shipbuilder Hikes Production with Portable Welding Unit – 39 to 40 (June).
*Shipyard Productivity, Mechanized Welding Revives – 43 to 45 (Jan.).
*Shock Absorber Manufacturer, Pollution Control Pays for – 46 (Jan.).
SMAW Electrodes, Effects of Wind on Radiographic Quality of Weld Deposited with Low-Hydrogen – K. W. Henrie and R. E. Long, 47 to 50 (April).
*Socket Welds – Inexpensive Design for Small Diameter Piping – J. Laskonis and G. Lycan, 50 to 51 (Feb.).
Soldering and Flux Practices in the Lamp Industry – I. S. Goodman, 34 to 37 (Oct.).
Solid State Bonding, Use of Electrodeposition to Provide Coatings for – J. W. Dini, 33 to 39 (Nov.).
Some Recent Advances in Flux Technology – W. Rubin, 39 to 44 (Oct.).
*South Carolina Gets a Peach of a Tank – 60 to 61 (April).
Square Wave AC Power, Multi-Electrodes in SAW with – T. A. Bunker, 36 to 40 (July).
*Stainless, Compound Stops Buckling in Weld-Repair of Thin-Gauge – 42 (May).
Stainless Steel Sealing Washers for LNG Tanker Repairs, The Development of – W. R. Schick, 15 to 21 (Dec.).
*Stainless Tanks Boost Brewer's Yield, Welded Nickel – 46 (Aug.).

*A Practical Welder article

Steel, Resistance Welding of Galvalume Sheet – J. C. Baker and C. F. Meitzner, 21 to 28 (June).
Submerged Arc Narrow-Gap Welding of Thick-Walled Components – H. Hantsch, K. Million, and H. Zimmerman, 27 to 34 (July).
*Surfacing Alloy Doubles the Service Life of Drill Stabilizer Blades – 49 (Dec.).
*Surfacing New and Worn Equipment, Navy Saves Millions – 44 to 46 (June).
*Surfacing Takes the Brunt of High Abrasive Wear, Selective – 56 (Nov.).
*Tank, South Carolina Gets a Peach of a – 60 to 61 (April).
*Tank Assembly, Flexible Manufacturing Speeds – 54 to 55 (Feb.).
Tanker Repairs, The Development of Stainless Steel Sealing Washers for LNG – W. R. Schick, 15 to 21 (Dec.).
*Teaching Techniques, Welding Instructors Trained in Latest – 48 (Jan.).
Teaching Welding to Management – E. G. Hornberger and W. B. Flowers, 27 to 32 (May).
Temperature Sensing of Cooling Rates for Arc Welding Control, Infrared – W. E. Lukens and R. A. Morris, 27 to 33 (Jan.).
Test Components by All-Position Percussion Welding, Attachment of Thermocouple Instrumentation to – E. G. Thompson, 31 to 33 (June.).
Thermocouple Instrumentation to Test Components by All-Position Percussion Welding, Attachment of – E. G. Thompson, 31 to 33 (June).
Thick-Walled Components, Submerged Arc Narrow-Gap Welding of – H. Hantsch, K. Million and H. Zimmerman, 27 to 34 (July).
Titanium Assemblies, Laminating Brazing Filler Metals for – S. W. Lan, 23 to 28 (Oct.).
*Torch Solves Surfacing Problem, Compact Plasma – 44 (May).
*Trainees Start at the Very Beginning – an Interview, Welder – 53 to 55 (April).
*Training, Scrap Pile Welder – D. Ragsdale, 57 (April).
*Training Program Moves Workers into Well-Paying Welder, Machinist Jobs – 35 to 36 (June).
Transducers, Ultrasonic Nondestructive Evaluation of Butt Welds Using Electromagnetic-Acoustic – C. M. Fortunko and R. E. Schramm, 39 to 46 (Feb.).
*Transmission Part Production, Automatic GMAW Speeds – 54 to 55 (Sept.).
Transparent Welding Curtains – D. H. Sliney, C. E. Moss, C. G. Miller and J. B. Stephens, 17 to 24 (May).
*Tube Weld Line Delivered, Largest – 53 (Oct.).
Ultrasonic Nondestructive Evaluation of Butt Welds Using Electromagnetic-Acoustic Transducers – C. M. Fortunko and R. E. Schramm, 39 to 46 (Feb.).
Unique Structure to Tap North Sea Oil – J. Weber, 21 to 25 (July).
Use of Electrodeposition to Provide Coatings for Solid State Bonding – J. W. Dini, 33 to 39 (Nov.).
Vacuum Environment, Mobile Electron Beam Gun Operation in the Soft – G. A. Goeppner, 33 to 38 (April).
*Vacuum Flux Recovery System, Wheel Maker Cuts Costs with – 50 (Jan.).
Weld Failures: They Could be the Result of Violating Simple Design Principles, Part I – O. W. Blodgett, 16 to 23 (Mar.).
Weld Failures: They Could be the Result of Violating Simple Design Principles, Part II – O. W. Blodgett, 25 to 31 (April).
Weldability of Nickel-Base As-Cast and Powder Metallurgy Superalloys, A New Approach to the – M. H. Haafkens, and J. H. G. Matthey, 25 to 30 (Nov.).
*Welded Nickel Stainless Tanks Boost Brewer's Yield – 46 (Aug.).
Welding Consultants – More Than Troubleshooters – O. McWane, 63 to 64 (April).
Welding Electrode Coatings – Improved Method for the Determination of Water in – E. L. Montgomery, 39 to 42 (Dec.).
*Welding Instructors Trained in Latest Teaching Techniques – 48 (Jan.).
Welding Journal – Six Decades of Reporting, The – T. P. Schoonmaker, 17 to 23 (Jan.).
*Welding Students Burn Midnight Oil – 49 (Mar.).
Welding for Water-Cooled Gas Turbine Applications, Diffusion – D. R. Spriggs and M. C. Muth, 41 to 48 (Nov.).
*Welding Fume Removal System Cuts Costs, Recirculates Air – 53 to 54 (Nov.).
*Welding Helps Bring Back the Classic American Convertible – 50 to 51 (Oct.).
*Welding Line Assembles 900 Auto Wheels an Hour – 44 to 45 (Aug.).
Welding, Robots, and Productivity – K. E. McKee, 30 to 35 (Sept.).
*Welding Technology Home Study Course Educates Distributor Salesforce – 42 to 43 (Aug.).
*Welds at 200 Parts per Hour, Programmable Machine Makes Eight – 58 (Nov.).
Wheel Maker Cuts Costs with Vacuum Flux Recovery System – 50 (Jan.).
*X-ray Source Checks Nuclear Reactor Vessels, Giant – 49 (Feb.).

*A Practical Welder article

Part 2—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Acoustic Emission Techniques, In-Process Quality Detection of Friction Welds Using—K. K. Wang, G. R. Rief and S. K. Oh, 312-s to 316-s (Sept.).
AISI 316 and Inconel 625 by High Temperature Brazing with Nickel Base Filler Metals, Thermal and Metallurgical Influences on—E. Lugscheider, K.-D. Partz and R. Lison, 329-s to 333-s (Oct.).
Alpha-Beta Titanium Alloys, Technical Note: Evaluation of Triplex Post-Weld Heat Treatments for—W. A. Baeslack, III, 197-s to 199-s (June).
Aluminum, Tests of Fillet Welds in—M. L. Sharp, R. L. Rolf, G. E. Nordmark and J. W. Clark, 117-s to 124-s (April).
Aluminum Alloy, Pitting Corrosion Property of Vacuum Brazed 7072 Clad—T. Hattori and A. T. Kuhn, 339-s to 342-s (Oct.).
Aluminum Alloys—A Quantitative Heat-Flow Analysis, Welding Thin Plates of—S. Kou, T. Kanevsky and S. Fyfitch, 175-s to 181-s (June).
Arc Weld Pools, Behavior of Hydrogen in—D. G. Howden, 103-s to 108-s (April).
Arc Welding of Thorium-Doped Iridium Alloys, High-Power Laser and—S. A. David and C. T. Liu, 157-s to 163-s (May).
Austenite Transformation in Stainless Steels, The Ferrite to—G. L. Leone and H. W. Kerr, 13-s to 22-s (Jan.).

*A Practical Welder article

Austenitic Stainless Steel-Ferrite Steel Weld Joint Failures—R. L. Klueh and J. F. King, 302-s to 311-s (Sept.).
Austenitic Stainless Steels, Hot Cracking Susceptibility of—T. Ogawa and E. Tsunetomi, 82-s to 93-s (Mar.).
Austenitic Stainless Steels Weld Metals, Solidification Cracking and Analytical Electron Microscopy of—M. J. Cieslak, A. M. Ritter and W. F. Savage, 1-s to 8-s (Jan.).
Austenitic Stainless Steel Weldments: Part III—The Effect of Solidification Behavior on Hot Cracking Susceptibility—J. C. Lippold and W. F. Savage, 388-s to 396-s (Dec.).
Austenitic Stainless Steel Welds, Effects of Ferrite Content in—D. Hauser and J. A. VanEcho, 37-s to 44-s (Feb.).

Behavior of Hydrogen in Arc Weld Pools—D. G. Howden, 103-s to 108-s (April).
Beryllium to Monel, Vacuum Brazing—T. G. Glenn, V. K. Grotsky and D. L. Miller, 334-s to 338-s (Oct.).
Brazed 7072 Clad Aluminum Alloy, Pitting Corrosion Property of Vacuum—T. Hattori and A. T. Kuhn, 339-s to 342-s (Oct.).
Brazing Alloy, The Tensile Strength of Stainless Steel Wire and Rod Butt Joints as a Function of the—R. M. Trimmer and A. T. Kuhn, 327-s to 328-s (Oct.).
Brazing Beryllium to Monel, Vacuum—T. G. Glenn, V. K. Grotsky and D. L. Miller, 334-s to 338-s (Oct.).
Brazing of Inconel Alloy MA 754 for High Temperature Applications—T. J. Kelly, 317-s to 319-s (Oct.).
Brazing with Nickel Base Filler Metals, Thermal and Metallurgical Influences on AISI 316 and Inconel 625 by High Temperature—E. Lugscheider, K. -D. Partz and R. Lison, 329-s to 333-s (Oct.).

Calcium and Magnesium Treatment on Steel Weldability, Effect of—R. K. Wilson, 182-s to 188-s (June).
"Chevron Cracking"—A New Form of Hydrogen Cracking in Steel Weld Metals—J. M. F. Mota and R. L. Apps, 222-s to 228-s (July).
Chevron Cracks in Submerged Arc Weld Metal, The Formation of—D. J. Allen, B. Chew and P. Harris, 212-s to 221-s (July).
Chi and Sigma Phases Formation in Aged 16-8-2 Weld Metal, Prevention of—J. M. Leitnaker, 9-s to 12-s (Jan.).
Chloride Pitting Corrosion Resistance, The Weldability of Nitrogen-Containing Austenitic Stainless Steel: Part I—T. Ogawa, S. Aoki, T. Sakamoto and T. Zaizen, 139-s to 148-s (May).
C-Mn All-Weld-Metal Deposits, The Effect of Heat Input on the Microstructure and Properties of—G. M. Evans, 125-s to 132-s (April).
Copper-Contamination Cracking: Cracking Mechanism and Crack Inhibitors—E. F. Nippes and D. J. Ball, 75-s to 81-s (Mar.).
Corrosion Characteristics of Soft Solder Fluxes, The—L. P. Costas, 320-s to 326-s (Oct.).
Corrosion Cracking in HY-130 Weldments, Fractographic and Microstructural Analysis of Stress—F. W. Fraser and E. A. Metzbower, 112-s to 116-s (April).
Corrosion Resistance, The Weldability of Nitrogen-Containing Austenitic Stainless Steel: Part I—Chloride Pitting—T. Ogawa, S. Aoki, T. Sakamoto and T. Zaizen, 139-s to 148-s (May).
Crack Arrest Fracture Toughness in Welded 9% Nickel Steels Used in Cryogenic Storage Tanks, Discussion on the Measurement of—94-s to 96-s (Mar.).
Crack Arrest Fracture Toughness of a Structural Steel (A36)—E. J. Ripling and P. B. Crosley, 65-s to 74-s (Mar.).
Cracking and Analytical Electron Microscopy of Austenitic Stainless Steel Weld Metals, Solidification—M. J. Cieslak, A. M. Ritter and W. F. Savage, 1-s to 8-s (Jan.).
Cracking in HY-130 Weldments, Hydrogen-Assisted—W. F. Savage, E. F. Nippes and E. I. Husa, 233-s to 242-s (Aug.).
Cracking Mechanism and Crack Inhibitors, Copper-Contamination Cracking—E. F. Nippes and D. J. Ball, 75-s to 81-s (Mar.).
Cracking Susceptibility of Austenitic Stainless Steels, Hot—T. Ogawa and W. Tsunetomi, 82-s to 93-s (Mar.).
Creep-Rupture Behavior of Weldments—M. J. Mangione, 50-s to 57-s (Feb.).
Cryogenic Applications, Weldability of Grain Refined Fe-12Ni-0.25Ti Steel for—D. E. Williams and J. W. Morris, Jr., 133-s to 138-s (May).
Cryogenic Storage Tanks", Discussion on "The Measurement of Crack Arrest Fracture Toughness in Welded 9% Steels Used in—94-s to 96-s (Mar.).

Development of a SMAW Procedure for Cast Iron, The—B. Appelt and R. E. Long, 109-s to 111-s (April).
Discussion on "Ferrite Morphology in High Molybdenum Stainless Steels"—164-s to 165-s (May).
Discussion on "The Measurement of Crack Arrest Fracture Toughness in Welded 9% Nickel Steels Used in Cryogenic Storage Tanks"—95-s to 96-s (Mar.).
Dissimilar Metal Welds—Transition Joints Literature Review—C. D. Lundin, 58-s to 63-s (Feb.).

Effect of Calcium and Magnesium Treatment on Steel Weldability—R. K. Wilson, 182-s to 188-s (June).
Effect of Electrical Resistance and Nugget Formation During Spot Welding, The—J. G. Kaiser, G. J. Dunn and T. W. Eagar, 167-s to 174-s (June).
Effects of Ferrite Content in Austenitic Stainless Steel Welds—D. Hauser and J. A. VanEcho, 37-s to 44-s (Feb.).
Effect of Heat Input on the Microstructure and Properties of C-Mn All-Weld-Metal Deposits, The—G. M. Evans, 125-s to 132-s (April).
Effect of Nickel Plating on Fe-BCu-Mo and -W—T. Yoshida and H. Ohmura, 363-s to 372-s (Nov.).
Effects of Titanium on Submerged Arc Weld Metal, The—J. P. Snyder, III, and A. W. Pense, 201-s to 211-s (July).
Electrical Resistance on Nugget Formation During Spot Welding, The Effect of—J. G. Kaiser, G. J. Dunn and T. W. Eagar, 167-s to 174-s (June).
Electron Beam Welding of the Nickel Base Superalloy IN-738 LC, High Temperature—B. Jahnke, 343-s to 347-s (Nov.).
Electron Microscopy, Substructure Characterization of 16-8-2 GTA Weld through Transmission—J. R. Foulds and J. Moteff, 189-s to 196-s (June).
Electroslag Welding Process, A Parametric Study of the—W. S. Ricci and T. W. Eagar, 397-s to 400-s (Dec.).
Electroslag Welding Process—Part II, Fabricating Steel Safety Using the—D. N. Shackleton, 23-s to 32-s (Jan.).
Eutectic Weld Metal Microstructure, Modification of—C. E. Cross and D. L. Olson, 381-s to 387-s (Dec.).
Extension of the WRC Ferrite Number System—D. J. Kotecki, 352-s to 361-s, (Nov.).

Fabricating Steel Safety Using the Electroslag Welding Process—Part II—D. N. Shackleton, 23-s to 32-s (Jan.).
Failures, Austenitic Stainless Steel-Ferritic Steel Weld Joint Failures—R. L. Klueh and J. F. King, 302-s to 311-s (Sept.).
Fe-BCu-Mo and -W, Effect of Nickel Plating on—T. Yoshida and H. Ohmura, 363-s to 372-s (Nov.).
Fe-12Ni-0.25Ti Steel for Cryogenic Applications, Weldability of Grain Refined—D. E. Williams and J. W. Morris, Jr., 133-s to 138-s (May).
Ferrite to Austenite Transformation in Stainless Steels, The—G. L. Leone and H. W. Kerr, 13-s to 32-s (Jan.).
Ferrite Content in Austenitic Stainless Steel Welds, Effects

of—D. Hauser and J. A. VanEcho, 37-s to 44-s (Feb.).
Ferrite Number System, Extension of the WRC—D. J. Kotecki, 352-s to 361-s (Nov.).
Fillet Welds in Aluminum, Tests of—M. L. Sharp, R. L. Rolf, G. E. Nordmark and J. W. Clark, 117-s to 124-s (April).
Fitup Tolerances for Mechanized Gas Tungsten Arc Welding Large Diameter Pipe—P. W. Turner and G. D. Eichenberger, 283-s to 292-s (Sept.).
Fluxes, Slag Metal Reactions in Binary CaF_2-Metal Oxide Welding—C. S. Chai and T. W. Eagar, 229-s to 232-s (July).
Formation of Chevron Cracks in Submerged Arc Weld Metal, The—D. J. Allen, B. Chew and P. Harris, 212-s to 221-s (July).
Fractographic and Microstructural Analysis of Stress Corrosion Cracking in HY-130 Weldments—F. W. Fraser and E. A. Metzbower, 112-s to 116-s (April).
Fracture Toughness of a Structural Steel (A36), Crack Arrest—E. J. Ripling and P. B. Crosley, 65-s to 74-s (Mar.).
Friction Welds Using Acoustic Emission Techniques, In-Process Quality Detection of—K. K. Wang, G. R. Reif, and S. K. Oh, 312-s to 316-s, (Sept.).
Fusion Zone Geometry, Mechanism for Minor Element Effect on GTA—C. R. Heiple and J. R. Roper, 97-s to 102-s (April).
Geometry, Mechanism for Minor Element Effect on GTA Fusion Zone—C. R. Heiple and J. R. Roper, 97-s to 102-s (April).
GMA Welding, Heat Generation and Heat Flow in the Filler Metal in—J. H. Waszink and G. J. P. M. Van Den Heuvel, 269-s to 282-s (Aug.).
GTA Fusion Zone Geometry, Mechanism for Minor Element Effect on—C. R. Heiple and J. R. Roper, 97-s to 102-s (April).
GTA Welds through Transmission Elecron Microscopy, Substructure Characterization of 16-8-2—J. R. Foulds and J. Moteff, 189-s to 196-s (June).
Heat-Flow Analysis, Welding Thin Plates of Aluminum Alloys—A Quantitative—S. Kou, T. Kanevsky and S. Fyfitch, 175-s to 181-s (June).
Heat Flow in the Filler Metal in GMA Welding, Heat Generation and—J. H. Waszink and G. J. P. M. Van Den Heuvel, 269-s to 282-s (Aug.).
Heat Generation and Heat Flow in the Filler Metal in GMA Welding—J. H. Waszink and G. J. P. M. Van Den Heuvel, 269-s to 282-s (Aug.).
Heat Treatments for Alpha-Beta Titanium Alloys, Technical Note: Evaluation of Triplex Postweld—W. A. Baeslack, III, 197-s to 199-s (June).
High-Power Laser and Arc Welding of Thorium-Doped Iridium Alloys—S. A. David and C. T. Liu, 157-s to 163-s (May).
High Strength Line Pipe Steel, Weldability of—T. H. North, A. B. Rothwell, A. G. Glover and R. J. Pick, 243-s to 257-s (Aug.).
High-Temperature Electron Beam Welding of the Nickel Base Superalloy IN-738 LC—B. Jahnke, 343-s to 347-s (Nov.).
History and Accomplishments of WRC/PVRC and Recognition of William Spraragen, the First Director of WRC, The—K. H. Koopman, 33-s to 36-s (Jan.).
Hot Cracking Susceptibility of Austenitic Stainless Steels—T. Ogawa and E. Tsunetomi, 82-s to 93-s (Mar.).
Hot Cracking Susceptibility, Solidification of Austenitic Stainless Steel Weldments: Part III—The Effect of Solidification Behavior—J. C. Lippold and W. F. Savage, 388-s to 396-s (Dec.).
HSLA Steels, New Fluxes of Improved Weld Metal Toughness for—R. Kohno, T. Takami, N. Mori and K. Nagano, 373-s to 380-s (Dec.).
HY-130 Weldments, Hydrogen-Assisted Cracking in—W. F. Savage, E. F. Nippes and E. I. Husa, 233-s to 242-s (Aug.).
Hydro Experience with Dissimilar Metal Welds in Boiler Tubing, Ontario—R. B. Dooley, G. G. Stephenson, M. J. Tinkler, M. D. C. Moles and H. J. Westwood, 45-s to 49-s (Feb.).
Hydrogen-Assisted Cracking in HY-130 Weldments—W. F. Savage, E. F. Nippes and E. I. Husa, 233-s to 242-s, (Aug.).
Hydrogen Cracking in Steel Weld Metals, "Chevron Cracking"—A New Form of—J. M. F. Mota and R. L. Apps, 222-s to 228-s (July).
Hydrogen in Arc Weld Pools, Behavior of—D. G. Howden, 103-s to 108-s (April).
Improving the Weldability of Ni-Base Superalloy 713 C—A. Koren, M. Roman, I. Weisshaus and A. Kaufman, 348-s to 351-s (Nov.).
IN-738 LC, High Temperature Electron Beam Welding of the Nickel Base Superalloy—B. Jahnke, 343-s to 347-s (Nov.).
Inconel Alloy MA 754 for High Temperature Applications, Brazing of—T. J. Kelly, 317-s to 319-s (Oct.).
Inconel 625 by High Temperature Brazing with Nickel Base Filler Metals, Thermal and Metallurgical Influences on AISI 316 and—E. Lugscheider, K. -D. Partz and R. Lison, 329-s to 333-s (Oct.).
In-Process Quality Detection of Friction Welds Using Acoustic Emission Techniques—K. K. Wang, G. R. Reif and S. K. Oh, 312-s to 316-s (Sept.).
Iridium Alloys, High-Power Laser and Arc Welding of Thorium-Doped—S.A. David and C. T. Liu, 157-s to 163-s (May).
Iron, The Development of a SMAW Procedure for Cast—B. Appelt and R. E. Long, 109-s to 111-s (April).
Joints Literature Review, Dissimilar Metal Welds—Transition—C. D. Lundin, 58-s to 63-s (Feb.).
Laser and Arc Welding of Thorium-Doped Iridium Alloys, High-Power—S. A. David and C. T. Liu, 157-s to 163-s (May).
Magnesium Treatment on Steel Weldability, Effects of Calcium and—R. K. Wilson, 182-s to 188-s (June).
Mechanism for Minor Elements Effect on GTA Fusion Zone Geometry—C. R. Heiple and J. R. Roper, 97-s to 102-s (April).
Metallurgical Influences on AISI 316 and Inconel 625 by High Temperature Brazing with Nickel Base Filler Metals, Thermal and—E. Lugscheider, K. -D. Partz and R. Lison, 329-s to 333-s (Oct.).
Microscopy, Substructure Characterization of 16-8-2 GTA Weld through Transmission Electron—J. R. Foulds and J. Moteff, 189-s to 196-s (June).
Microscopy of Austenitic Stainless Steel Weld Metals, Solidification Cracking and Analytical Electron—M. J. Cieslak, A. M. Ritter and W. F. Savage, 1-s to 8-s (Jan.).
Microstructural Analyses of Stress Corrosion Cracking in HY-130 Weldments, Fractographic and—F. W. Fraser and E. A. Metzbower, 112-s to 116-s (April).
Modification of Eutectic Weld Metal Microstructure—C. E. Cross and D. L. Olson, 381-s to 387-s (Dec.).
Molybdenum Stainless Steels", Discussion on "Ferrite Morphology in High—164-s to 165-s (May).
Monel, Vacuum Brazing Beryllium to—T. G. Glenn, V. K. Grotsky and D. L. Miller, 334-s to 338-s (Oct.).
Morphology in High Molybdenum Stainless Steels", Discussion on "Ferrite—164-s to 165-s (May).
New Fluxes of Improved Weld Metal Toughness for HSLA Steels—R. Kohno, T. Takami, N. Mori and K. Nagano, 373-s to 380-s (Dec.).
Ni-Base Superalloy 713 C, Improving the Weldability of—A. Koren, M. Roman, I. Weisshaus and A. Kaufman, 348-s to 351-s (Nov.).
Nickel Base Filler Metals, Thermal and Metallurgical Influences on AISI 316 and Inconel 625 by High Temperature Brazing

with—E. Lugscheider, K. -D. Partz and R. Lison, 329-s to 333-s (Oct.).
Nickel Base Superalloy IN-738 LC, High-Temperature Electron Beam Welding of the—B. Jahnke, 343-s to 347-s (Nov.).
Nickel Plating on Fe-BCu-Mo and -W. Effect of—T. Yoshida and H. Ohmura, 363-s to 372-s (Nov.).
Nickel Steels Used in Cryogenic Storage Tanks", Discussion on "The Measurement of Crack Arrest Fracture Toughness in Welded 9%—94-s to 96-s (Mar.).
Nitrogen-Containing Austenitic Stainless Steel: Part I—Chloride Pitting Corrosion Resistance, The Weldability of—T. Ogawa, S. Aoki, T. Sakamoto and T. Zaizen, 139-s to 148-s (May).
Nitrogen-Strengthened Stainless Steels, Weldability of—R. H. Espy, 149-s to 156-s (May).
Nugget Formation During Spot Welding, The Effect of Electrical Resistance on—J. G. Kaiser, G. J. Dunn and T. W. Eagar—167-s to 174-s (June).
Ontario Hydro Experience With Dissimilar Metal Welds in Boiler Tubing—R. B. Dooley, G.G. Stephenson, M. J. Tinkler, M. D. C. Moles, and H. J. Westwood, 45-s to 49-s (Feb.).
Parametric Study of the Electroslag Welding Process, A—W. S. Ricci and T. W. Eagar, 397-s to 400-s (Dec.).
Pipe Fitup Tolerances for Mechanized Gas Tungsten Arc Welding Large Diameter—P. W. Turner and G. D. Eichenberger, 283-s to 292-s (Sept.).
Pipe Steels, Weldability of High Strength Line—T. H. North, A. B. Rothwell, A. G. Glover and R. J. Pick, 243-s to 257-s (Aug.).
Pitting Corrosion Property of Vacuum Brazed 7072 Clad Aluminum Alloy—T. Hattori and A. T. Kuhn, 339-s to 342-s (Oct.).
Plates of Aluminum Alloys—A Quantitative Heat-Flow Analysis, Welding Thin—S. Kou, T. Kanevsky and S. Fyfitch, 175-s to 181-s (June).
Prevention of Chi and Sigma Phases Formation in Aged 16-8-2 Weld Metal—J. M. Leitnaker, 9-s to 12-s (Jan.).
Rails, Structure and Properties of Thermite Welds in—J. Myers, G. H. Geiger and D. R. Poirier, 258-s to 268-s (Aug.).
Resistance on Nugget Formation During Spot Welding, The Effect of Electrical—J. G. Kaiser, G. J. Dunn and T. W. Eagar, 167-s to 174-s (June).
Rod Butt Joints as a Function of the Brasing Alloy, The Tensile Strength of Stainless Steel Wire and—R. M. Trimmer and A. T. Kuhn, 327-s to 328-s (Oct.).
Sigma Phases Formation in Aged 16-8-2 Weld Metal, Prevention of Chi and—J. M. Leitnaker, 9-s to 12-s (Jan.).
Slag Metal Reactions in Binary CaF_2-Metal Oxide Welding Fumes—C. S. Chai and T. W. Eagar, 229-s to 232-s (July).
SMAW Procedure for Cast Iron, The Development of a—B. Appelt and R. E. Long, 109-s to 111-s (April).
Solder Fluxes, The Corrosion Characteristics of Soft—L. P. Costas 320-s to 326-s (Oct.).
Solidification Behavior on Hot Cracking Susceptibility—Solidification of Austenitic Stainless Steel Weldments: Part III—The Effect of—J. C. Lippold and W. F. Savage, 388-s to 396-s (Dec.).
Solidification Cracking and Analytical Electron Microscopy of Austenitic Stainless Steel Weld Metals—M. J. Cieslak, A. M. Ritter and W. F. Savage, 1-s to 8-s (Jan.).
Solidification of Austenitic Stainless Steel Weldments: Part III—The Effect of Solidification Behavior on Hot Cracking Susceptibility—J. C. Lippold and W. F. Savage, 388-s to 396-s (Dec.).
Spot Welding, The Effect of Electrical Resistance on Nugget Formation During—J. G. Kaiser, G. J. Dunn and T. W. Eagar, 167-s to 174-s (June).
Spraragen, the First Director of WRC, The History and Accomplishments of WRC/PVRC and Recognition of William—K. H. Koopman, 33-s to 36-s (Jan.).
Stainless Steels, The Ferrite to Austenite Transformation in—G. L. Leone and H. W. Kerr, 13-s to 22-s (Jan.).
Stainless Steels, Hot Cracking Susceptibility of Austenitic—T. Ogawa and E. Tsunetomi, 82-s to 93-s (Mar.).
Stainless Steels, Weldability of Nitrogen-Strengthened—R. H. Espy, 149-s to 156-s (May).
Stainless Steel-Ferritic Steel Weld Joint Failures, Austenitic—R. L. Klueh and J. F. King, 302-s to 311-s (Sept.).
Stainless Steel Weld Metal, The Thermal Expansion Characteristics of—J. W. Elmer, D. L. Olson and D. K. Matlock, 293-s to 301-s (Sept.).
Stainless Steel Weld Metals, Solidification Cracking and Analytical Electron Microscopy of Austenitic—M. J. Cieslak, A. M. Ritter and W. F. Savage, 1-s to 8-s (Jan.).
Stainless Steel Welds, Effects of Ferrite Content in Austenitic—D. Hauser and J. A. VanEcho, 37-s to 44-s (Feb.).
Stainless Wire and Rod Butt Joints as a Function of the Brazing Alloy, The Tensile Strength of—R. M. Trimmer and A. T. Kuhn, 327-s to 328-s (Oct.).
Steel Weldability, Effect of Calcium and Magnesium Treatment on—R. K. Wilson, 182-s to 188-s (June).
Structural Steel (A36), Crack Arrest Fracture Toughness of a—E. J. Ripling and P. B. Crosley, 65-s to 74-s (Mar.).
Structure and Properties of Thermite Welds in Rails—J. Myers, G. H. Geiger and D. R. Poirier, 258-s to 268-s (Aug.).
Submerged Arc Weld Metal, The Effects of Titanium on—J. P. Snyder II and A. W. Pense, 201-s to 211-s (July).
Submerged Arc Weld Metal, The Formation of Chevron Cracks in—D. J. Allen, B. Chew and P. Harris, 212-s to 221-s (July).
Substructure Characterization of 16-8-2 GTA Weld through Transmission Electron Microscopy—J. R. Foulds and J. Moteff, 189-s to 196-s (June).
Superalloy 713 C, Improving the Weldability of Ni-Base—A. Koren, M. Roman, I. Weisshaus and A. Kaufman, 348-s to 351-s (Nov.).
Tanks", Discussion on "The Measurement of Crack Arrest Fracture Toughness in Welded 9% Nickel Steels Used in Cryogenic Storage—94-s to 96-s (Mar.).
Technical Note: Evaluation of Triplex Postweld Heat Treatment for Alpha-Beta Titanium Alloys—W. A. Baeslack, III, 197-s to 199-s (June).
Tensile Strength of Stainless Steel Wire and Rod Butt Joints as a Function of the Brazing Alloy—R. M. Trimmer and A. T. Kuhn, 327-s to 328-s (Oct.).
Tests of Fillet Welds in Aluminum—M. L. Sharp, R. L. Rolf, G. E. Nordmark and J. W. Clark, 117-s to 124-s (April).
Thermal and Metallurgical Influences on AISI 316 and Inconel 625 by High Temperature Brazing with Nickel Base Filler Metals—E. Lugscheider, K. -D. Partz, and R. Lison, 329-s to 333-s (Oct.).
Thermal Expansion Characteristics of Stainless Steel Weld Metal—J. W. Elmer, D. L. Olson and D. K. Matlock, 293-s to 301-s (Sept.).
Thermite Welds in Rails, Structure and Properties of—J. Myers, G. H. Geiger and D. R. Poirier, 258-s to 268-s (Aug.).
Thorium-Doped Iridium Alloys, High-Power Laser and Arc Welding of—S. A. David and C. T. Liu, 157-s to 163-s (May).
Titanium Alloys, Technical Note: Evaluation of Triplex Postweld Heat Treatments for Alpha-Beta—W. A. Baeslack, III, 193-s to 199-s (June).
Titanium on Submerged Arc Weld Metal, The Effects of—J. P. Snyder, II, and A. W. Pense, 201-s to 211-s (July).

Transmission Electron Microscopy, Substructure Characterization of 16-8-2 GTA Weld through – J. R. Foulds and J. Moteff, 189-s to 196-s (June).
Tubing, Ontario Hydro Experience with Dissimilar Metal Welds in Boiler – R. B. Dooley, G. G. Stephenson, M. J. Tinkler, M. D. C. Moles and H. J. Westwood, 45-s to 49-s (Feb.).

Vacuum Brazed 7072 Clad Aluminum Alloy, Pitting Corrosion Property of – T. Hattori and A. T. Kuhn, 339-s to 342-s (Oct.).
Vacuum Brazing Beryllium to Monel – T. G. Glenn, V. K. Grotsky and D. L. Miller, 334-s to 338-s (Oct.).

Weld Metal Microstructure, Modification of Eutectic – C. E. Cross and D. L. Olson, 381-s to 387-s (Dec.).
Weld Metal Toughness for HSLA Steels, New Fluxes of Improved – R. Kohno, T. Takami, N. Mori and K. Nagano, 373-s to 380-s (Dec.).
Weldability of Grain Refined Fe-12Ni-0.25Ti Steel for Cryogenic Applications – D. E. Williams and J. W. Morris, Jr., 133-s to 138-s (May).
Weldability of High Strength Line Pipe Steels – T. H. North, A. B. Rothwell, A. G. Glover and R. J. Pick, 243-s to 257-s (Aug.).
Weldability of Ni-Base Superalloy 713 C, Improving the – A. Koren, M. Roman, I. Weisshaus and A. Kaufman, 348-s to 351-s (Nov.).
Weldability of Nitrogen-Containing Austenitic Stainless Steel: Part I – Chloride Pitting Corrosion Resistance – T. Ogawa, S. Aoki, T. Sakamoto and T. Zaizen, 139-s to 148-s (May).
Weldability of Nitrogen-Strengthened Stainless Steels – R. H. Espy, 149-s to 156-s (May).
Welding of the Nickel Base Superalloy IN-738 LC, High-Temperature Electron Beam – B. Jahnke, 343-s to 347-s (Nov.).
Welding Thin Plates of Aluminum Alloys – A Quantitative Heat-Flow Analysis – S. Kou, T. Kanevsky and S. Fyfitch, 175-s to 181-s (June).
WRC Ferrite Number System, Extension of – D. J. Kotecki, 352-s to 361-s (Nov.).
WRC/PVRC and Recognition of William Spraragen, The First Director of WRC, The History and Accomplishments of – K. H. Koopman, 33-s to 36-s (Jan.).

AUTHOR INDEX

Allen, D. J., Chew, B. and Harris, P. – The Formation of Chevron Cracks in Submerged Arc Weld Metal, 212-s to 221-s (July).
Aoki, S., Sakamoto, T., Zaizen, T. and Ogawa, T. – The Weldability of Nitrogen-Containing Austenitic Stainless Steel: Part I – Chloride Pitting Corrosion Resistance, 139-s to 148-s (May).
Appelt, B. and Long, R. E. – The Development of a SMAW Procedure for Cast Iron, 109-s to 111-s (April).
Apps, R. L. and Mota, J. M. F. – "Chevron Cracking" – A New Form of Hydrogen Cracking in Steel Weld Metals, 222-s to 228-s (July).
Ball, D. J. and Nippes, E. F. – Copper-Containing Cracking: Mechanism and Crack Inhibitors, 75-s to 81-s (Mar.).
Baeslack, W. A. III – Technical Note: Evaluation of Triplex Postweld Heat Treatments for Alpha-Beta Titanium Alloys, 197-s to 199-s (June).
Chai, C. S. and Eagar, T. W. – Slag Metal Reactions in Binary CaF_2-Metal Oxide Welding Fluxes, 229-s to 232-s (July).
Chew, B., Allen, D. J. and Harris, P. – The Formation of Chevron Cracks in Submerged Arc Weld Metal, 212-s to 221-s (July).
Cieslak, M. J., Ritter, A. M. and Savage, W. F. – Solidification Cracking and Analytical Electron Microscopy of Austenitic Stainless Steel Weld Metals, 1-s to 8-s (Jan.).
Clark, J. W., Sharp, M. L., Rolf, R. L. and Nordmark, G. E. – Tests of Fillet Welds in Aluminum, 117-s to 124-s (April).
Costas, L. P. – The Corrosion Characteristics of Soft Solder Fluxes, 320-s to 326-s (Oct.).
Crosley, P. B. and Ripling, E. J. – Crack Arrest Fracture Toughness of a Structural Steel (A36), 65-s to 74-s (Mar.).
Cross, C. E. and Olson, D. L. – Modification of Eutectic Weld Metal Microstructure, 381-s to 387-s (Dec.).
David, S. A. and Liu, C. T. – High-Power Laser and Arc Welding of Thorium-Doped Iridium Alloys, 157-s to 163-s, (May).
Dooley, R. B., Stephenson, G. G., Tinkler, M. J., Moles, M. D. C. and Westwood, H. J. – Ontario Hydro Experience with Dissimilar Metal Welds in Boiler Tubing, 45-s to 49-s, (Feb.).
Dunn, G. J., Eagar, T. W. and Kaiser, J. G. – The Effect of Electrical Resistance on Nugget Formation During Spot Welding, 167-s to 174-s (June).
Eagar, T. W. and Chai, C. S. – Slag Metal Reactions in Binary CaF_2-Oxide Welding Fluxes, 229-s to 232-s (July).
Eagar, T. W. and Ricci, W. S. – A Parametric Study of the Electroslag Welding Process, 397-s to 400-s (Dec.).
Eagar, T. W., Kaiser, J. G. and Dunn, G. J. – The Effect of Electrical Resistance on Nugget Formation During Spot Welding, 167-s to 174-s (June).
Eichenberger, G. D. and Turner, P. W. – Fitup Tolerances for Mechanized Gas Tungsten Arc Welding Large Diameter Pipe, 283-s to 292-s (Sept.).
Elmer, J. W., Olson, D. L. and Matlock, D. K. – The Thermal Expansion Characteristics of Stainless Steel Weld Metal, 293-s to 301-s (Sept.).
Espy, R. H. – Weldability of Nitrogen-Strengthened Stainless Steels, 149-s to 156-s (May).
Evans, G. M. – The Effect of Heat Input on Microstructure and Properties of C-Mn All-Weld-Metal Deposits, 125-s to 132-s (April).
Foulds, J. R. and Moteff, J. – Substructure Characterization of 16-8-2 GTA Weld through Transmission Electron Microscopy, 189-s to 196-s (June).
Fraser, F. W. and Metzbower, E. A. – Fractographic and Microstructural Analyses of Stress Corrosion Cracking in HY-130 Weldments, 112-s to 116-s (April).
Fyfitch, S., Kou, S. and Kanevsky, T. – Welding Thin Plates of Aluminum Alloys – A Quantitative Heat-Flow Analysis, 175-s to 181-s (June).
Geiger, G. H., Myers, J. and Poirier, D. R. – Structure and Properties of Thermite Welds in Rails, 258-s to 268-s (Aug.).

Glenn, T. G., Grotsky, V. K. and Miller, D. L. – Vacuum Brazing Beryllium to Monel, 334-s to 338-s (Oct.).
Glover, A. G., North, T. H., Rothwell, A. B. and Pick, R. J. – Weldability of High Strength Line Pipe Steels, 243-s to 257-s (Aug.).
Grotsky, V. K., Glenn, T. G. and Miller, D. L. – Vacuum Brazing Beryllium to Monel, 334-s to 338-s (Oct.).

Harris, P., Allen, D. J. and Chew, B. – The Formation of Chevron Cracks in Submerged Arc Weld Metal, 212-s to 221-s (July).
Hattori, T. and Kuhn, A. T. – Pitting Corrosion Property of Vacuum Brazed 7072 Clad Aluminum Alloy, 339-s to 342-s (Oct.).
Hauser, D. and VanEcho, J. A. – Effects of Ferrite Content in Austenitic Stainless Steel Welds, 37-s to 44-s (Feb.).
Heiple, C. R. and Roper, J. R. – Mechanism for Minor Element Effect on GTA Fusion Zone Geometry, 97-s to 102-s (April).
Howden, D. G. – Behavior of Hydrogen in Arc Weld Pools, 103-s to 108-s (April).
Husa, E. I., Savage, W. F. and Nippes, E. F. – Hydrogen-Assisted Cracking in HY-130 Weldments, 233-s to 242-s (Aug.).

Jahnke, B. – High-Temperature Electron Beam Welding of the Nickel Base Superalloy IN-738 LC, 343-s to 347-s (Nov.).

Kaiser, J. G., Dunn, G. J. and Eagar, T. W. – The Effect of Electrical Resistance on Nugget Formation During Spot Welding, 167-s to 174-s (June).
Kanevsky, T., Fyfitch, S. and Kou, S. – Welding Thin Plates of Aluminum Alloys – A Quantitative Heat-Flow Analysis, 175-s to 181-s (June).
Kaufman, A., Koren, A., Roman, M. and Weisshaus, I. – Improving the Weldability of Ni-Base Superalloy 713 C, 348-s to 351-s (Nov.).
Kelly, T. J. – Brazing of Inconel Alloy MA 754 for High Temperature Applications, 317-s to 319-s (Oct.).
King, J. F. and Klueh, R. L. – Austenitic Stainless Steel-Ferritic Steel Weld Joint Failures, 302-s to 311-s (Sept.).
Kerr, H. W. and Leone, G. L. – The Ferrite to Austenite Transformation in Stainless Steels, 13-s to 22-s (Jan.).
Klueh, R. L. and King, J. F. – Austenitic Stainless Steel-Ferritic Steel Weld Joint Failures, 302-s to 311-s (Sept.).
Kohno, R., Takami, T., Mori, N. and Nagano, K. – New Fluxes of Improved Weld Metal Toughness for HSLA Steels, 373-s to 380-s (Dec.).
Koopman, K. H. – The History and Accomplishments of WRC/PVRC Recognition of William Spraragen, The First Director of WRC, 33-s to 36-s, (Jan.).
Koren, A., Roman, M., Weisshaus, I. and Kaufman, A. – Improving the Weldability of Ni-Base Superalloy 713 C, 348-s to 351-s (Nov.).
Kotecki, D. J. – Extension of the WRC Ferrite Number System, 352-s to 361-s (Nov.).
Kou, S., Kanevsky, T. and Fyfitch, S. – Welding Thin Plates of Aluminum Alloys – A Quantitative Heat-Flow Analysis, 175-s to 181-s (June).
Kuhn, A. T. and Hattori, T. – Pitting Corrosion Property of Vacuum Brazed 7072 Clad Aluminum Alloy, 339-s to 342-s (Oct.).
Kuhn, A. T. and Trimmer, R. M. – The Tensile Strength of Stainless Steel Wire and Rod Butt Joints as a Function of the Brazing Alloy, 327-s to 328-s (Oct.).

Leitnaker, J. M. – Prevention of Chi and Sigma Phases Formation in Aged 16-8-2 Weld Metal, 9-s to 12-s (Jan.).
Leone, G. L. and Kerr, H. W. – The Ferrite to Austenite Transformation in Stainless Steels, 13-s to 22-s (Jan.).
Lippold, J. C. and Savage, W. F. – Solidification of Austenitic Stainless Steel Weldments: Part III – The Effect of Solidification Behavior on Hot Cracking Susceptibility, 388-s to 396-s (Dec.).
Lison, R., Lugscheider, E. and Partz, K. -D. – Thermal and Metallurgical Influences on AISI 316 and Inconel 625 by High Temperature Brazing with Nickel Base Filler Metals, 329-s to 333-s (Oct.).
